Subject: MBMH: Units to Discontinue Water Service

Barbara,

I hope this finds you doing well! I wanted to first give thanks for the hard work Derek and his team have been putting into be flexible in installations the last few weeks. The list of priority installs has been completed, and represents a significant savings to our project.

With that, I've attached a list of units we are requesting water service to be disconnected that are vacant and currently metered. How may we go about getting that service cancelled?

Moving forward, is there a more preferred way to get this type of information to you? Or someone else in your team?

Thanks again for all the help to this point!
Jamen
