MEMORANDUM

On behalf of the District staff, we present the Fiscal Year 2025 Operating and Capital Improvement Budget. This budget was developed with a focus on efficient processes to streamline system operations and meet infrastructure needs. This budget is designed to support the strategic elements of the Board's 2020 strategic plan which are:

Water Sources: Manage and protect our current water sources and find alternative water sources.

Infrastructure: Provide high-quality water distribution systems and ensure the efficient operation of wastewater systems to cater to both present and future customers.

Fiscal Planning: Manage public funds to assure financial stability, prudent rate management, and demonstrate responsible stewardship.

Strategic Partners and Public Affairs: Build our relationships with the State, Federal, Regional, SVBGSA, and local public and non-profit agencies.

Organization Health/Personnel: Recruit and retain a highly qualified, diverse, and inspired workforce that delivers the essential services of the District while providing outstanding customer service.

Administrative Management: Create, maintain, update and implement policies and procedures to ensure sound management of the District.

Mary Lagasca, CPA
Director for Administrative Services

Remleh Scherzinger, MBA, P.E.
General Manager

← The 4th Avenue office is where the District's Operations and Maintenance Department is located.

ABOUT THE DISTRICT

Marina Coast is a county water district within the State of California that provides water, recycled water, and sewer services to the community of Marina and parts of Seaside, Del Rey Oaks, Monterey, and the East Garrison community. We are an independent special district established in 1960 under Water Code Division 12.

In 1958, a group of community members known as the Marina Community Service Corporation suggested forming a municipal-owned water system that would encompass the Marina Fire District, which covers around 1,600 acres. After two years, the Marina County Water District was officially established by a vote from the 766 registered voters in the unincorporated City of Marina.

Even before the formation of the District, studies showed that seawater was getting into the groundwater supply due to excessive pumping from the aquifers. As a result, in 1983, the District stopped pumping from the 180-foot well due to saltwater intrusion and drilled three deep wells in the 900-foot aquifer between 1983 and 1989. These wells now provide the District with its current water source. Later, in 1997, the District started operating a desalination plant to supplement well water, but it had to be shut down due to rising electricity costs. Due to the decreasing water supply, the District is constantly searching for new sources of water and expanding its conservation programs.

In 1970, the residents of Marina decided to tackle the problem of septic system failures and the increasing demand for better sanitation by constructing a sewage treatment plant and disposal system. They were able to finance this project by selling \$1.3 million in sewer bonds. The plant was operated by the District until 1993 when an agreement with the Monterey Regional Water Pollution Control Agency allowed Marina's wastewater to be treated at the regional plant. Despite this change, the District continued to maintain and operate Marina's sewer system.

Originally known as the Marina County Water District, the name was changed to Marina "Coast" Water District in 1994, to avoid any confusion with the Monterey County government.

MCWD's Imjin Office Park building houses the District's Administration, Engineering, Finance, and Water Resources Departments.

After the Fort Ord military base closed in 1997, the Army contracted the District to operate its water and wastewater systems, which were officially transferred to the District in 2001. Combining resources and services allowed the District to improve water distribution and storage efficiency while reducing operating costs.

We currently serve more than 41,000 customers through a water system that includes 220 miles of water lines, 8 domestic production wells with an additional standby capacity, 8 storage tanks, and 6 pumping stations that deliver water to 5 pressure zones. Our sewer system includes 177 miles of gravity mains and 6.5 miles of force mains with 20 sewer lift stations that process up to 2.2 millions of gallons per day (MGD) of septage. The processed water is then delivered to us through the tertiary system or Pure Water Monterey (PWM). Our newest service is the Recycled water system, which includes 13.5 miles of waterline and 1 tank with a maximum day delivery of 1.37 MGD to MCWD.

MARINA COAST WATER DISTRICT GSA

The Marina Coast Water District Groundwater Sustainability Agency (MCWDGSA) was formed in response to the States passage of a group of laws collectively know as the Sustainable Groundwater Management Act or SGMA. The SGMA Act is intended to mandate the “management and use of groundwater in a manner that can be maintained during the planning and implementation horizon without causing undesirable results.” The undesirable results are defined as chronic lowering of groundwater levels, reduction in groundwater storage, the prevention of seawater intrusion, degradation of groundwater quality, the prevention of land subsidence, and depletions of interconnected surface water.

The MCWDGSA covers areas of both the Monterey Subbasin and the 180/400 Foot subbasins of the Salinas Valley Groundwater basin. The Monterey Subbasin has been characterized as a “medium” priority basin while the 180/400 has been characterized as a “critically drafted basin. MCWDGSA led the development of the Groundwater Sustainability plan for the Monterey Subbasin which has been approved by the Department of Water Resources. The 180/400 plan was developed in coordination with the Salinas Valley Groundwater Sustainability Agency and has also been approved by the Department of Water Resources.

Both plans provide a path to achieve and document sustainable groundwater management by 2040 & 2042 and preserve the long-term sustainability of locally managed groundwater now and into the future.

The District supports the new housing development in the Fort Ord Community with water, wastewater, and recycled water services.

MARINA COAST WATER DISTRICT SERVICE AREA

MCWD BOARD

Gail Morton

President

directormorton@mcwd.org

Gail is an attorney in private practice and has been a community leader serving as Marina's Mayor Pro Tem and Councilmember previously.

Jan Shriner

Vice-President

directorshriner@mcwd.org

Jan is a trained biologist and continues to enjoy a lengthy career in outdoor education that has included both private and public sector roles. Jan was first elected to the MCWD Board in 2010.

OF DIRECTORS

Herbert Cortez, MS

Director
directorcortez@mcwd.org

Herbert's background in policy analysis and management makes him uniquely qualified to serve as a member of the Board of Directors of MCWD.

Brad Imamura

Director
directorimamura@mcwd.org

Brad retired from the Santa Clara Valley Water District. He has worked for the City of San Jose and the County of Santa Clara. Brad was first elected to the MCWD Board in November 2022.

Thomas Moore, Ph.D.

Director
directormoore@mcwd.org

Tom is a retired Army Colonel and currently teaches for the U.S. Naval War College Program at the Naval Postgraduate School. Tom was first elected to the MCWD Board in November 1994.

PRIOR YEAR ACC

For the 15th year in a row, the Marina Coast Water District has been awarded the Certificate of Achievement for Excellence in Financial Reporting by the Government Finance Officers Association (GFOA) for its FY 2021-22 Annual Financial Report.

This Certificate, the highest recognition in governmental accounting and financial reporting, confirms the District's commitment to providing expert financial planning, management, and reporting.

MCWD proudly recognizes Mary Lagasca, CPA, and Director of Administrative Services, and Tamela Hatfield, Accounting Supervisor for their excellent work in preparing the award-winning report.

Recently, the Marina Coast Water District was certified in the Blue Zones Worksite Validation Project to empower staff to live better, longer lives. This certification included tracking metrics from baseline to progression to the final results of a group's activity.

ACCOMPLISHMENTS

The Marina Coast Water District is proud to receive two awards from the American Public Works Association for the Ord Village Lift Station and the Recycled Water Pipelines projects last month. These awards confirm the District's commitment to protecting the environment, and supporting public health and safety by improving aging facilities.

"Your project was impressive and you... along with your entire team should be very proud of their project's award." – Philip Edwards, PE All Earth Geotechnical Engineering Inc.

In honor of Earth Day 2024, the Marina Coast Water District spent a day beautifying the Veterans Transition Center of California in Marina. Breaking into teams early morning, employees weeded flower beds, mowed tall grass, and trimmed overgrown shrubs and trees from existing landscape adjacent to Imjin Road.

COST CENTERS

MCWD operates as a single enterprise fund with 6 separate cost centers. Under District Ordinance No. 43, the District maintains separate cost centers to ensure that revenues and expenses are appropriately segregated and maintained for the Marina systems, the Ord Community systems, the Recycled Water system, and the MCWD Groundwater Sustainability Agency (GSA).

Water Cost Centers: Account for operations through all Departments of the District.

(a) Marina Water: Generates its revenue from potable water sales through water connections within Marina and other sources.

(b) Ord Water: Generates its revenue from potable water sales through water connections within the Ord Community, comprised of several land-use jurisdictions, and other sources.

Wastewater Collection (Sewer) Cost Centers: Account for operations through the District's Administration, Operations & Maintenance, and Engineering Departments.

(a) Marina Sewer: Generates its revenue from sewer collection fees through sewer connections within Marina.

(b) Ord Sewer: Generates its revenue from sewer collection fees through sewer connections within the Ord Community, comprised of several land-use jurisdictions, and other sources.

Recycled Water Cost Center: Accounts for its operations through the Administration, Operations & Maintenance, and Engineering Departments of the District and generates its revenue from recycled water sales.

Groundwater Sustainability Agency Cost Center: Accounts for its operations through the Administration and Water Resources Departments of the District.

◀ A MCWD system operator is conducting routine inspections at one of the district's enclosed storage facilities.

COST ALLOCATION

← The Vector is one of the District's equipment used to maintain the water, recycled water and sewer lines.

The District allocates direct costs to the appropriate cost centers, while other costs associated with specific functions are divided among six primary cost centers based on factors such as water rights, pipeline length, and customer count.

Costs not dedicated to a specific center are shared among all centers, creating efficiencies and cost savings for administrative functions. This method represents approximately 15% of the District's Operating Expenses and is referred to as "all others." It covers expenses such as Administration salaries and benefits, Board-related costs, Information Technology-related costs, accounting services, and rate study costs. These functions serve the District as a whole and cannot be reasonably allocated by direct basis or by one of the above metrics. The District contracted with Hildebrand Consulting in 2023 to review the cost allocation methods and provide a plan that can be found on the District's website.

These are the assigned percentages for FY 2024-2025:

Marina Coast Water District
 Cost Allocation Based on FY2022-23 Operating Expenses
 FY 2024-25 Budget

	Cost Center	Code	Audited Amount in USD \$*	Percentage
01	Marina Water	MW	4,646,260	27%
02	Marina Sewer	SW	869,359	5%
03	Ord Water	OW	9,481,208	55%
04	Ord Sewer	OS	1,999,924	12%
05	Recycled Water	RW	155,257	1%
	Totals		17,152,008	100%

*Source: Audited Financials 06/30/2023-Statement of Revenues, Expenses and Changes in Net Position

KEY ASSUMPTIONS

REVENUE

Projected revenues in Marina and Ord Systems are based on current customer accounts and projected development activity at the service rates approved by the Board in April 29, 2024.

This includes a 5% growth rate in the Ord Community for residential accounts (single-family and multi-family) and a 0.8% growth factor for Marina.

CHANGES TO THE WATER RATE STRUCTURE

All water customers are currently charged a tiered rate based on their consumption and receive a set amount of Tier 1 water. However, it has been observed that some non-residential and multifamily accounts require significantly more water than the allocated amount of Tier 1 water. Therefore, it is recommended that all non-single-family customers pay a uniform consumption charge instead of the current tiered rate.

CHANGES TO THE SEWER RATE STRUCTURE

The current system for sewer customers involves a fixed rate, regardless of how much sewage they produce. To recover costs from customers who produce more sewage, this Study suggests implementing a uniform flow-based charge. Residential customers will be charged based on their average winter water usage (December, January, and February). This is a standard industry practice, as outdoor water usage is typically minimal during this time. The District will update the indoor water usage value for each residential account when the water usage data from the previous winter becomes available. New accounts with no water usage history will be assigned a temporary default value of 5 HCF per month, which is the current winter average for a single-family home.

◀ Routine inspections are key to maintaining the facilities within our service area.

Non-residential customers should have a separate meter for outdoor water usage. This means that the non-residential flow-based charge will be calculated based on monthly water usage.

Cost Centers receive revenue from various sources, including rate revenue, miscellaneous service fees, penalties, operating revenue (e.g., lease revenue), interest revenue on investments, and grants. Additionally, they receive Capacity Charge revenue from developers, which is partly reserved for funding growth-related projects.

The projections of all non-rate revenues are based on the FY 2024-2025 budgeted revenues except for interest income, which is calculated annually based on projected fund balances and an assumed interest rate of 0.75 percent. This interest rate is consistent with the effective interest earnings across the Cost Centers over the past few years.

Wheeling Charges increased from \$3,087.92 per month to \$3,171.25 per month based on the cumulative Engineering News Record (ENR) 20-city average Construction Cost Index (CCI) for 2024 is 2.7%.

MCWD Groundwater Sustainability Agency is operated as an internal division of the District. Revenues are generated from its customers, currently the MCWD Marina water and Ord water cost centers.

Monthly rates with the rate increases for the Marina customers and Ord customers are as follows:

Marina Monthly Service Charges (Effective July 1, 2024)

Marina	Current Rate in USD \$	Proposed Rate in USD \$	Change in USD \$
Water (Average Consumption of 6 HCF)	51.32	68.65	17.33
Sewer (Average Consumption of 5 HCF)	17.98	18.70	0.72
Total Bill	69.30	87.35	18.05

Ord Monthly Service Charges (Effective July 1, 2024)

Marina	Current Rate in USD \$	Proposed Rate in USD \$	Change in USD \$
Water (Average Consumption of 6 HCF)	78.58	93.41	14.83
Sewer (Average Consumption of 5 HCF)	38.15	40.65	2.50
Total Bill	116.73	134.06	17.33

- Per District Ordinance 6.089.090 Section B, each July 1st, Capacity Charges will be adjusted by an increment based on the change in the ENR-CCI over the prior year, using the index published for the first quarter of the calendar year, and rounding to the nearest \$25. The CCI for 1st Quarter 2024 is 2.7%.
- Proposed revenue for the Recycled Water System is based on the 2024 rate study conducted by Hildebrand Consulting and approved by the Board on April 29, 2024.
- Board waiver of Section 6.08.070 of the District Codes, that provides that twenty-five percent of all monthly water charges collected by the District shall be used for long-term water supply projects.

OPERATING EXPENSES AND COST INFLATION ASSUMPTIONS

Future operating and maintenance expenses for each Cost Center were projected based primarily on actual expenditures from FY 2022/23 and adjusted for inflation. As an exception, all staff-related costs are based on the FY 2023/24 budget since these costs were recently negotiated as part of the recent Memorandum of Understanding (MOU).

Annual cost escalation factors for the various types of expenses were developed based on a review of historical inflation trends, published inflation forecasts, industry experience, and discussions with District staff. During the projection period, most expenses are projected to increase at 3.0 percent per year, with the exception of the following:

- Salaries are adjusted by 10% as per the Memorandum of Understanding (MOU) agreements with the District employee groups.
- Increased healthcare cost of 12% from prior year, a 5% increase is allotted for future increases.
- Capital Improvement Project of \$38,864,000.

FY 2024-2025 Capital Improvement Project Budget

Funding Source	Amount
2024 Bond	7,398,000
Building Removal Fund	916,000

REVENUE AND OTHER SOURCES CATEGORIES

OPERATING REVENUE

Water Sales: Include single and multi-family residential, business, government, and hydrant water charges.

Sewer Sales: Include residential and non-residential wastewater collection charges.

Recycled Water Sales: Include recycled water sales through rates and agreements.

Developer Fees: Reimbursement fees for developer costs.

Water Source Fees: Fees collected by the MCWD GSA for its work and projects.

Other Fees & Charges: Include fire system charges, backflow fees, late fees, plan-check, and permit fees.

NON-OPERATING REVENUE & OTHER SOURCES

Capacity Fees/Capital Surcharges: Capacity fees are one time charges to new developments connecting to the District's water system and sewer system. Capital Surcharge fees are monthly flat rate fees charged to occupants in the new development connected to the District's water system and sewer system.

Interest: Revenue earned by lending money to other entities.

Other Revenues: Includes deferred revenue, rental income, grant revenue.

SRF Loan Proceeds: agreement proceeds from the State Revolving Fund Loan for the RUWAP Distribution Project.

2019 COP Proceeds: Certificate of Participation (COP) bond proceeds.

Building Removal Proceeds: FORA bond proceeds given to MCWD for building removal.

Future Grant: A grant is an amount of money that the government or other institution gives to an organization for a particular purpose.

2024 Bond: Debt securities issued by the District to fund and to finance capital projects.

EXPENSE AND OTHER USES CATEGORIES

OPERATING EXPENSES

Salaries & Benefits: Include wages and all employee benefits such as health, pension, workers' compensation, disability, and life insurance.

Department Expenses: Includes administrative and office expenses, operating supplies, maintenance and repair costs, information technology costs, professional services, and other fees.

Interest Expense: Includes interest expense for bond/loan debt service.

Franchise and Admin Fees: Includes franchise fees and administrative fees.

NON-OPERATING EXPENSES & OTHER USES:

Total CIP/Capital Equipment: Includes capital improvement projects and capital equipment purchases.

Principal Debt Service: Amount of debt service payment attributable to the principal portion of the loan/bond.

Transfer to Cap. Replacement Reserve: It has been standard procedure for the District to allocate a set amount of funds toward the Capital Replacement Reserve.

Transfer To/(From) Reserves, Net: Represents all other transfers to and from the District's various reserve funds.

District staff currently reviewing service requests that were issued by the Customer Service.

ADMINISTRATION DEPARTMENT

The Administration department serves as the backbone of the district, managing overall operations and providing crucial support to the Board.

CUSTOMER SERVICE

Customer Service stands as the frontline representative of the District, helping customers and addressing their needs promptly. Their responsibilities span from reading and installing meters to managing accounts receivable, including monthly billing and payment processing.

Customer Service Annual Number of Transactions

Transaction Type	Number of Transactions
Customer phone calls	10,992
Online payments	35,735
Interactive Voice Response (IVR) transactions	5,163
Bills sent out	75,823
Notices sent out	8,979
Low-income assistance payments processed	123

CUSTOMER SERVICE PREVIOUS YEAR ACCOMPLISHMENTS

In the previous fiscal year (2024), Customer Service achieved several notable accomplishments:

1. Received CA Water & Wastewater Arrearage Grant Program, allocating \$224,000 to assist 540 water and sewer accounts.
2. Ensured timely and accurate billing for all bill cycles throughout the year.

MCWD Staff also helps care for the environment by participating in events like Earth Day.

 The District's Customer Service Staff members are the main link between customers and the District.

CUSTOMER SERVICE - FISCAL YEAR 2025 GOALS AND OBJECTIVES

For the upcoming fiscal year (2025), Customer Service has outlined the following goals and objectives:

1. Support and implement an Advance Meter Infrastructure program.
2. Complete the meter testing program for 185 meters.
3. Cross-train Customer Service Billing Technicians (CSBT) on all customer service and billing duties and conduct job shadowing with meter readers to increase operational knowledge.
4. Ensure accurate and timely billing for every bill cycle.
5. Improve the customer experience by enabling customers to connect deposits via POS or debit card and implement a process to receive customer connect deposits remotely.
6. Implement Integrated Payment Solutions for an enhanced customer experience by providing services such as:
 - (a) E-billing
 - (b) Online payments – credit, debit & E-check
 - (c) Mobile App Payments

FINANCE DEPARTMENT

The Finance department plays a pivotal role in financial management, handling tasks such as compiling the annual budget, managing accounts payable, processing payroll, and ensuring compliance with Generally Accepted Accounting Principles (GAAP). Their meticulous attention to fiscal policies and procedures guarantees the integrity and transparency of the District's financial operations.

FINANCE – FISCAL YEAR 2024 PRIOR YEAR ACCOMPLISHMENTS

In the Finance department, achievements in the previous year include:

1. Successfully integrated the HR Module of the Springbrook Financial Software.
2. Received the Government Finance Officers Association (GFOA) Award for Excellence in Financial Reporting for the 15th consecutive year.
3. Revised investment and reserve policies to align with current financial objectives.
4. Enhanced financial controls through purchase order encumbrances.
5. Conducted a comprehensive 5-Year Rate Study, providing valuable insights for strategic decision-making on rates and fees.
6. Efficiently processed accounts payable checks, with approximately 1,550 checks processed annually.
7. Processed payroll transactions, totaling 1,300 checks and ACH payments annually.

FINANCE – FISCAL YEAR 2025 GOALS AND OBJECTIVES

1. Transition to the cloud version of Springbrook Financial Software.
2. Launch Employee Portal for streamlined access to essential HR or Payroll resources including W-2 forms and paystubs.
3. Finalize work with consultants on capital assets database and revise Capital Asset Policy
4. Finalize and implement revised purchase order and accounts payable procedures in collaboration with consultants.

OPERATIONS & MAINTENANCE DEPARTMENT

The Operations and Maintenance (O&M) Department oversees the water, wastewater, and recycled water systems of the District and maintains its fleet and buildings. With a team of 20 full-time employees, the department manages the conveyance systems by installing, repairing, and replacing water, sewer, and recycle mains and service lines. The department operates and maintains 20 sewer lift stations, 8 water wells, 9 water storage reservoirs, over 40 pressure-reducing valves, and 6 water booster pump stations. The department also ensures regulatory compliance and reporting for various agencies such as the State Waterboards Division of Drinking Water, Central Coast Waterboards, State and Regional Airboards, Monterey County Environmental Health, and the Department of Transportation. The department has standby personnel available 24/7 to respond to any situation.

ON-GOING PROJECTS AND PREVIOUS YEAR ACCOMPLISHMENTS

- The District purchased a new CCTV sewer track camera and system and integrated the software into the District's CMMS and GIS software.
- Completing the Phase 1 SCADA upgrade brought new screen layouts, alarming mechanisms, redundant communications, enhanced controls, and outdated I/O replacement
- Procured and installed 10 Flygt sewage pumps at critical sewer lift stations within the Ord sewer system
- The District purchased two electric fleet vehicles and an electric forklift
- Completion of D zone booster upsize and Variable Frequency Drive (VFD) installation
- The District will complete the PLC Upgrade Project Phase 1, bringing new Programmable Logic Controllers (PLC) to the water well sites.

System Operators routinely check and maintain all the sewer lines within the District's service area.

FY 24/25 Operations & Maintenance Department Expenses by Category in USD \$

FY 2024-2025 PLANNED IMPROVEMENTS OR PROJECTS

- Replacement of Army step-up transformer Motor Control Centers with soft starters/VFD at well 30 and 31
- Security system enhancements at the District offices
- Installation of new Mag meters at F Booster and Marina Booster
- Completion of service line inventory for the Districts water services
- Phase 2 of SCADA Upgrade project will incorporate additional security enhancements and flow and pressure monitoring at the District's pump stations
- Phase 2 of the PLC Upgrade Project, which will finish the replacement of all of the District's current PLC's with new long-term supported models.

LABORATORY DEPARTMENT

Our objective is to provide high-quality water (potable and recycled water) and efficiently operate wastewater collection system to serve existing and future customers.

LABORATORY DEPARTMENT PRIOR YEAR (FY 2023-2024) ACCOMPLISHMENTS

The District took approximately 775 water samples:

- a) Distribution bacteriological samples
- b) Source water Samples
 - Raw Water well samples
 - Quarterly sampling was performed for Trichloroethylene (TCE), Carbon Tetrachloride (CT), and Vinyl Chloride in wells in the vicinity of Army cleanup plumes. All results are either Non-detection or under the Public Health Goal or Maximum Contaminant Level.
 - Perflurahexonic Acid (PFHxA) at well 29 was sampled quarterly, and levels were below the detectible level for reporting (DLR). The state issued a reduced monitoring plan for the District.

FY 2024-2025 PLANNED IMPROVEMENTS OR PROJECTS:

The District will perform approximately 520 routing bacteriological samples

- 28 Raw water well samples
- Volatile Organic Compounds, Synthetic Organic Compounds, Nitrates,
- Radiological, General/mineral, and organic sampling to be conducted at our source wells
- Additional sampling at the District's storage tanks for VOC's and General/Mineral
- Disinfection by-product sampling in the distribution system

Operators regularly collect water samples to ensure that the water we provide is within regulatory standards.

Collecting a sample from one of the sampling stations located throughout the District.

CONSERVATION DEPARTMENT

Using water efficiently is the “new normal” to preserve our precious resource. Conservation has played a key role in keeping the District’s overall pumping level for the last few years while our population continues to grow.

The Conservation Department is responsible for the efficient use of our water resources. This responsibility can manifest itself in different ways.

Conservation is responsible for collecting, reporting, and using data. The data is used to measure how water is being used at a city scale, neighborhood scale, and down to how each dwelling unit is using water. Much of this data is collected and transmitted to various County and State agencies for aggregate State and County analysis.

One of the many reports Conservation is responsible for is the State mandated water loss audit that is completed every year. This year’s water loss numbers indicate a continued improvement not only in the overall amount of water that is being metered but how the District is monitoring the system has improved to be aware of any system leaks through pressure monitoring for example.

Another facet of the Conservation Department is the outreach function that it plays. For many customers the only District Staff that they interact with is our Conservation Staff. The Conservation Department attends many community events including the Monterey County Fair, Marina Garden Club, and other local events to carry the Conservation message forward to the community.

Conservation Specialists and Operations staff on-site demonstrating how the irrigation controller works in conserving water use.

Besides the community events Conservation Staff conducts many customer home visits to assist with leak detection, irrigation optimization, high water use, and they investigate any water waste alerts the District receives.

Conservation is also a critical component of the District's outreach programs. Staff promotes water use efficiency through mailers, email flyers, social media, and by providing Home Owners Associations with best practices information to provide to homeowners. The Department leads the way when a new State or local regulations are being implemented. Conservation also manages the In-School Water, Science, and Conservation program designed to reach the District's youngest customer through in school lessons and events.

Another program Conservation manages is the Water Use Efficiency Incentive Program. The program promotes Water Use Efficiency by incentivizing lower water use through providing incentives (or rebates) for customer installed devices or landscapes to lower the use of our water resources. Below is a list of the current incentives and rebates:

- a) Evapotranspiration-based irrigation Controller Rebate
- b) Rain or Soil Moisture Shut-off Switch Rebate
- c) Lawn and Sprinkler Replacement Incentives
- d) Rainwater Catchment Incentive Program
- e) Master Shut-off Valve Rebate
- f) Flow Sensor Rebate
- g) High Efficiency Clothes Washer Rebate
- h) High Efficiency Toilet and Water free Urinal Rebates
- i) Hot Water Recirculation Pump Rebate

Moreover, MCWD has available free water-saving tools for all of its customers, such as 1.5 gallons/minute water-efficient showerheads, low-flow faucet aerators, hose-end shut-off nozzles, and toilet leak detection tablets.

CONSERVATION GOALS FOR THE NEXT YEAR:

- a) Begin implementation of the California Urban Water Use Efficiency Standards
- b) Development of a Homeowner Landscape Best Practices and Tool kit to assist homeowners who are interested in landscaping areas of their homes. For example, many new homes are purchased without backyard landscaping.
- c) Increase the meter testing program to include a statistical sample of small residential meters. This will improve our water measurements to identify any loss.
- d) Continued participation in a District wide AMI meter program plan

ENGINEERING DEPARTMENT

The Engineering Department is responsible for the planning, design, and construction of the District's infrastructure to provide safe affordable potable water, recycled water, and wastewater collection. The Department formulates the District's Master Plans for each service to accommodate the necessary capacity for residential and commercial development demands. The Master Plans are implemented through the District's Five-Year Capital Improvement Plan and annual Capital Improvement Plans (CIP).

The Engineering Department is charged with managing the majority of the District's capital improvement projects. The Department is responsible for the planning, bidding, and construction management of District-sponsored projects ensuring they are constructed pursuant to the District plans, specifications, processes, and procedures. The Engineering Department also manages the District's system maps, models, and GIS systems updating them as the District continues to grow.

Along with District-sponsored projects, the Department is responsible for the review of development plans to verify they are compliant with current District ordinances and specifications. Once development plans have been approved the department is entrusted with the inspection of the infrastructure installed by the developer contractors. As areas of the Ord community develop, managing developer-driven projects can constitute a significant portion of the Engineering Department's project load.

The Engineering Department includes Information Technology (IT). The IT division administers and provides technical support to staff on various applications to ensure that they are optimally utilized. Mapping, design, finance, and systems operation software are integrated where possible to create operational efficiency throughout the organization. IT monitors the security of the District's IT systems to prevent cyber breaches and manages the District's IT equipment including repair, replacement, and maintenance contracts. The Department works closely with the Operations Department to keep current District systems operating appropriately and manage the replacement of the existing infrastructure to maintain service in accordance with current law, codes, or permits.

The water, sewer, and recycled water systems serving the Marina and Ord Communities have expanded over the past year, and so has the Engineering Department. The Department has welcomed new members to fill the positions of Engineering Technician, Assistant Engineer, and Senior Project Manager. This will enhance the team's capacity and capabilities. The Engineering Department is looking forward to improving project scope completion rates, staff utilization and retention, costs to budgeted amounts (CIP Projects), and project review and approval efficiencies for development projects.

◀ The Engineering Department leverages the use of GIS in managing its projects.

PRIOR YEAR ACHIEVEMENTS AND FY 2025 GOALS

In the previous fiscal year, MCWD Engineering executed \$6.2 million in new and programmatic capital improvements, including one recycled water and one sewer project that were each recognized as Project of the Year by the American Public Works Association. Working closely with the development community, MCWD Engineering oversaw the construction of nearly ten miles of new water, sewer, and recycled water main and upgrading and adding to existing facilities to create a more interconnected and robust utility network. This new infrastructure supported the completion of over 300 new residential units, helping to alleviate the region's housing crisis and broadening MCWD's ratepayer base.

MCWD Engineering is excited to carry this momentum into 2025, executing a continuing stream of capital projects, and working with our land use jurisdiction and development partners to design and plan the next round of projects that will sustain MCWD's quality and growth. MCWD Engineering looks to 2025 to improve the percentage of project scopes completed and project review efficiencies. Use of these metrics will support the department's drive towards efficiency by improving costing, fee rates, staff demands, and customer service.

WATER RESOURCES DEPARTMENT

The Water Resources Department is responsible for implementing the District's water conservation programs, which involve data collection, reporting, and surveys. They also offer incentive programs for water conservation, a conservation certification program for property transfers, and public outreach for conservation.

Additionally, they manage the development of the District's Climate Action Plan, the implementation of improvements at the Imjin Office Park, and Annexation activities for the District.

The Water Resources Department also manages the District's Groundwater Sustainability Agency, which oversees implementing the Monterey Sub-basin Groundwater Sustainability Plan. This plan was adopted by the MCWD Board in January 2022 and covers a 50-year span. The goal is to achieve sustainability within 20 years and maintain it for the following 30 years. Sustainability is defined as meeting six indicators: preventing the lowering groundwater levels, preventing the reduction of groundwater storage, preventing seawater intrusion, preserving water quality, preventing land subsidence, and avoiding surface water depletion.

Water Resources Staff also is involved many other regional water agency Boards and Committees. Some examples, Staff is the Committee Chair for the Salinas Valley Groundwater Basin Groundwater Sustainability Agency's Monterey Subbasin Committee, a member of the SVBGSA's Advisory Committee to the SVBGSA Board, a member of the Monterey County Water Resources Basin Management Advisory Committee and attends and monitors other agency activities and meetings.

Enclosed Storage Facilities within the District are closely monitored and inspected by System Operators.

PRIOR YEAR ACCOMPLISHMENTS

- In Summer of 2023 the Water Resources Department applied for a Sustainable Groundwater Management Act Implementation Grant from the California Department of Water Resources for the implementation of the Monterey Subbasin Groundwater Sustainability Plan.
- In early 2024 Marina Coast Water District Groundwater Sustainability Agency was awarded a \$6.4 million dollar grant for Groundwater Sustainability Plan implementation activities through April of 2026. These activities include the construction of two clusters of monitoring wells, seawater intrusion model development, and regional project feasibility analyses.
- The Water Resources Department also welcomed two new employees, a Water Resources Analyst, and a Water Resources Technician. Both positions have led to improved monitoring of our groundwater aquifers, improved reporting, and furthered sustainability plan implementation.
- The District began to monitor groundwater elevation through its network, which includes 37 Representative Monitoring Sites (RMS) in the Marina-Ord Area and 13 RMSs in the Corral de Tierra Area. Currently, all groundwater levels are collected in the fall each year by the following collection agencies: Fort Ord, USGS, Seaside Basin Water Master, and MCWRA. The District has been gaining permission from these agencies to initiate an in-house groundwater elevation monitoring network and has obtained access to 25 of the 37 Representative Monitoring Sites in the Marina-Ord Area.
- In addition to groundwater elevation monitoring, the District proactively monitors seawater intrusion into the deep aquifers to safeguard freshwater supplies. The Water Resource Department has invested in two 106 TLC Meters that

The inside of the A1/A2 Tanks that were constructed by the District. This structure will help make the District more resilient in providing water for its customers.

assist in these monitoring efforts by measuring the temperature, level, and conductivity of the aquifers, which can provide an early warning sign of sea water intrusion. Soon, the department plans to install pressure transducers into a selected subset of monitoring wells, which will provide a high resolution of groundwater data, allowing the District to manage groundwater levels more precisely.

- The Water Resources Department continues to develop and foster regional relationships with other agencies, stakeholders, and industry groups who are involved with managing Water Resources in our region. Staff has been appointed to various committees and boards to contribute insight, knowledge, and resources to plan for the area's water resource utilization in the future.

GOALS FOR THE UPCOMING YEAR

- Water Resources plans to keep adding Staff this year with the recruitment of a Water Resources Engineer. This position is ripe for inclusion as we have grant funded design & construction activities for our groundwater sustainability plan. Specifically, the engineer will work on the installation of two new monitoring wells clusters, further develop an Indirect Potable Reuse & Aquifer Storage project, and assist in the analyses of the regional project feasibility studies being completed by others.
- Water Resources will construct two new monitoring well clusters to add additional data regarding our deeper aquifers and their behavior. In conjunction with our hydrogeological consultants, the department will complete the seawater intrusion model, further develop our internal monitoring projects, and improve our reporting processes.

CAPITAL IMPROVEMENT PROGRAM (CIP) DETAILS

Capital Projects are infrastructure projects MCWD builds to meet the needs of the water, wastewater, and recycled water systems within its jurisdiction. These projects can take the form of pipelines, storage tanks, treatment facilities, and flood management projects. They include projects that meet the long-term strategies of the District and are designed to meet regulatory requirements and replace aging facilities. The Capital Improvement Plan is modified each year to reflect changes in regulatory requirements and budget constraints.

Project Description

Development of improvement to program management tool for the CIP and implementation efforts.

Project Need

Tracking and orderly data analysis of the CIP projects and implementation needs. Provides the District data and information to properly plan and implement projects, resource allocation, and financial planning,

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k
157	28	30	33	33	33	0

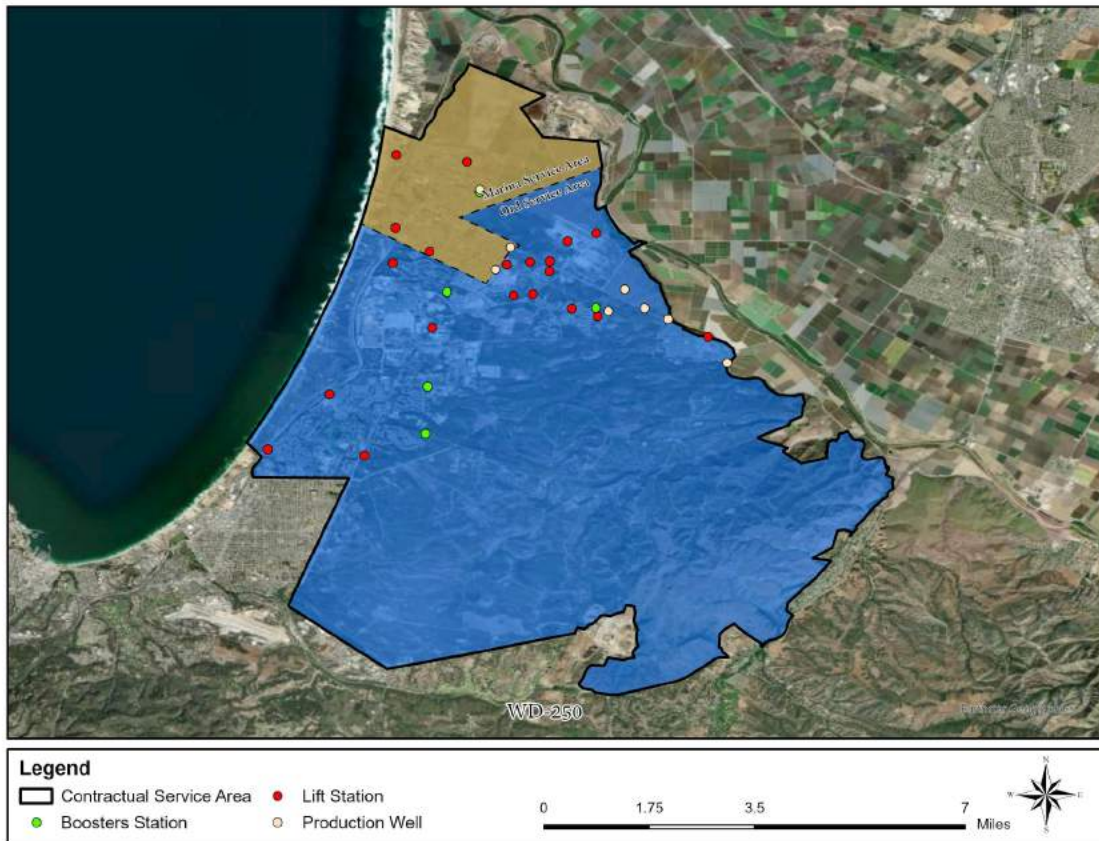

Project Description

Programmable Logic Controller (PLC) phased replacement will be done to replace existing PLCs that are no longer supported with new PLCs.

Project Need

PLCs are the main control hardware units for the pump stations, and the manufacturer no longer supports the current ones, and replacement parts will become challenging to procure after 2024.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k
553	553	0	0	0	0	0

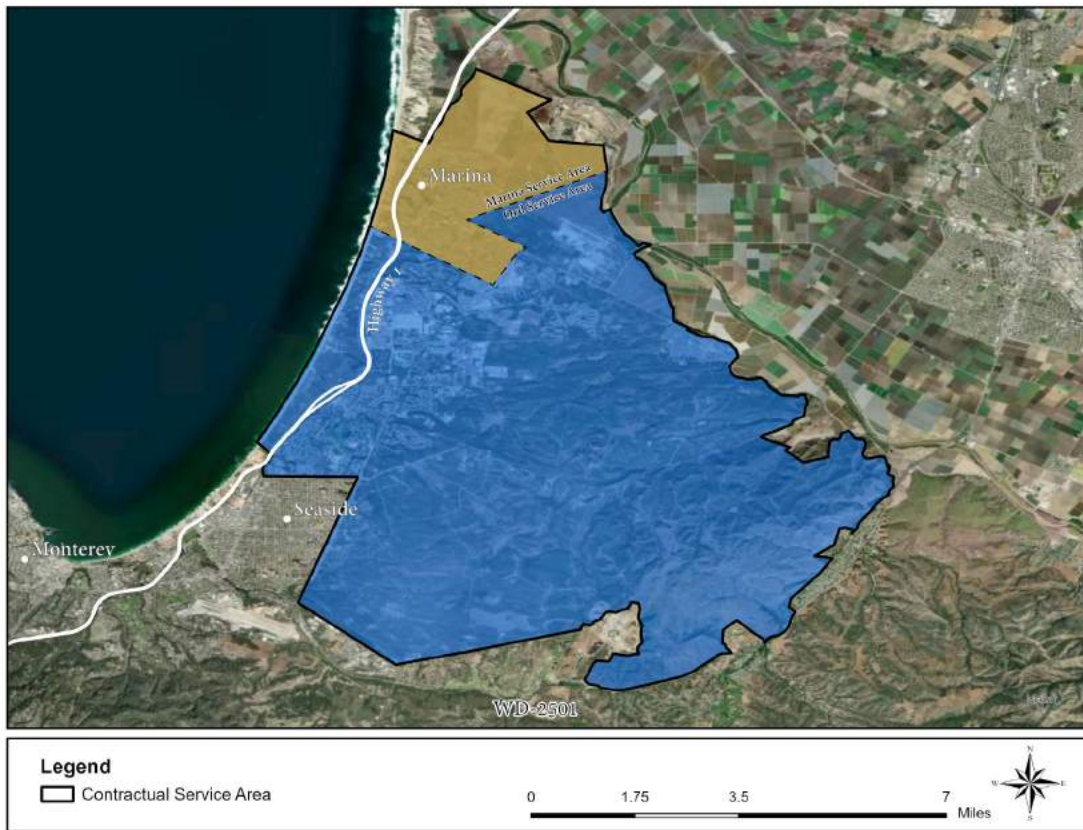

Project Description

Project includes a variety of efforts including: upgrade to latest InTouch version, update interface screens, add pressure, pump efficiency, and power monitoring, new switches and alarms at various sites, chlorine dosing capabilities, cellular backup, and others.

Project Need

Remote monitoring and control capabilities need enhancement to increase operational efficiency and risk management.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k
682	682	0	0	0	0	0

Project Description

The project includes the installation of systems that will improve outside and on-premises security. These include:

- Remote premises monitoring to enable quick investigation of potential intruders.
- Faster emergency response time.
- Manage risks arising out of workplace violence or acts of terrorism.
- Protect the District from property loss resulting from theft and/or vandalism.
- Protect the District from liability for personal injury to customers, site visitors, or employees (whether legitimate or fraudulent claims).

Project Need

The project's primary goal is to improve the physical security at various District locations including but not limited to the three office locations, reservoirs, lift stations, and booster stations used by the District to protect important data, confidential information, networks, software, equipment, facilities, assets, and personnel from both external and internal threats.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k

Project Description

Rehabilitate wells on a programmatic approach to scrub and clean column, install new pumps, and other down-hole efforts as required. Efforts will address Well 31.

Project Need

Maintenance and renovation of wells maintain supply reliability.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k
170	170	0	0	0	0	0

Project Description

This project includes Master Plan projects G-P2, G-P3, G-P4, G-P5, G-PS-B, G-T-A1, and G-T-A2. These projects connect the planned infrastructure to the existing transmission system. This project is intended to replace the existing Zone Sand Tank and Pump Station B and Pump Station C. Alignment is "Planned Zone A Tank Site". Limits are "From future Zone A tanks to future Zone A (existing Zone C) transmission lines". Pressure Zone is "Zone A".

Project Need

The District has minimal "A" Zone storage capacity. The A1/A2 Zone Tanks provide operational, fire, and emergency water storage for Zone A in the Ord Community and Central Marina. The B and C booster pumps will pump water from the A zone tanks to Zones B and C. The facilities currently serving these functions are over sixty years old and are approaching the end of their useful life.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k
1,350	1,350	0	0	0	0	0

Project Description

This project consists of the construction of a new 2.2 MG storage tank adjacent to the existing Zone B storage tank. Pressure Zone is "Zone B".

Project Need

This project is intended to mitigate an existing storage deficiency and facilitate maintenance.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k
10,658	4,326	6,332	0	0	0	0

Project Description

Initial investigations to identify and develop rehabilitation requirements.

Project Need

Well 12 needs rehabilitation in order to restart and prepare for irrigation deliveries.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k
161	161	0	0	0	0	0

Project Description

Project investigates issues, develops alternatives, and designs and constructs a brine line discharge system to allow existing and potentially future small-scale desalination plants to discharge brine through the M1W ocean outfall. The project will be conducted in phases with the initial phase addressing program, partnering, and preliminary system planning development.

Project Need

The Regional Desalination Project (RDP) was developed out of regional efforts to reduce groundwater pumping and increase supply availability and resiliency. The benefits to MCWD included supply for the Ord Community area and reduced reliance on groundwater, which in turn, improves groundwater sustainability throughout the Salinas Valley subbasins.

Projected 5-Year CIP Budget

Castroville Water Pipeline Intertie - 28,300 LF 20-inch diam.

Project #: GW-2310

Project Description

The project concept will extend the potable water system north of existing Marina service area and connect to Castroville. This connection will enhance supply availability and reliability for Castroville and areas between. This preliminary engineering phase of the project will investigate partners, project needs, and preliminary engineering. Once the first phase is completed, the next phase will begin the design and construction process.

Project Need

To increase water resiliency for the extended community through the expansion of the existing MCWD distribution system.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k

Recoat tank exterior to extend asset useful life.

Project Need

Existing coating is failing and needs to be redone to improve protection from corrosive environment and extend life of asset.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k
840	337	503	0	0	0	0

McClure Road Water Pipeline - 1,460 LF, 12-inch diam.

Project #: OW-0340

Project Description

This project consists of a new 12-inch pipeline (approximately 1,460-LF). This pipeline is intended to serve portions of the Seaside Resort development and to tie-in the existing water infrastructure in Fairway Drive to the higher-energy water pipeline in General Jim Moore Boulevard. The alignment runs west within McClure Way from General Jim Moore Boulevard to the eastern end of Fairway Drive. The pipe will have B-zone pressure.

Project Need

This project is needed to serve the Seaside golf course area and residential project elements. The diameter is needed to allow for adequate fire-flows to the hotel site. Further, this pipe segment will resolve low-pressure issues prevalent at the east-end of Fairway Drive. In addition, this project will satisfy the needs identified in Projects W9 and W10 in the Water Master Plan.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k
300	300	0	0	0	0	0

Project Description

Remove or remodel old barrack buildings within the Corporation Yard.

Project Need

Existing corporation yard has significant safety concerns with deteriorating buildings that are still in use for the Operations and Maintenance staff. Removal/abatement and remodeling are necessary to continue operations within the facilities until a replacement Corporation Yard can be built.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k
472	472	0	0	0	0	0

Project Description

This project consists of demolishing wastewater treatment structures and equipment and removing blighted buildings on the Army's former main Fort Ord Wastewater Treatment Plant (WWTP) on the west side of Highway 1 on Beach Range Road between the 8th Street overcrossing and the Del Monte Boulevard overcrossing.

Project Need

This project is needed to honor long-standing commitments to State Parks, FORA, and the community. The site presents health and safety concerns and increases the liability on MCWD. MCWD has received monetary resources to conduct much of the needed demolition/removal work.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k

Inter-Garrison Rd Pipeline Upsizing Schoonover to East Garrison - 1,800 LF, 18-inch diam.

Project #: OW-2421

Project Description

Construct a new 18-inch pipeline along Inter-Garrison from Schoonover to the existing system in East Garrison to provide a second supply source to East Garrison. Approximately 1,800 LF. Pipeline replaces an existing 12-inch line.

Project Need

This project is required to improve reliability of fire flows for the East Garrison Community. The existing pipe is not of a modern material and is under-sized.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k

Replace Sewer Pipeline Reservation Road Near Crestview Court - 525 LF, 10-inch diam.

Project #: MS-0205

Project Description

This project includes the replacement of the existing 8-inch gravity main with new 10-inch gravity main (approx. 525 LF) along Reservation Road from 200 feet west of Crestview Court to 800 feet west of Crestview Court. Alignment is "Reservation Rd". Limits are "From 200' w/o Crestview Ct to 800' w/o Crestview Ct".

Project Need

Increased size provides capacity for future peak wet weather flows.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k
347	347	0	0	0	0	0

Project Description

This project consists of the installation of a new sanitary sewer lift station and associated gravity and force-main sewer pipes. The proposed location of the lift station is the Northeast corner of Gloria Jean Tate Park. A gravity sewer pipe feeding the lift station is proposed along the North edge of the park. A force-main conveying the discharge from the lift station is proposed to replace (up-size) the existing force-main facility south, across Reservation Road, and through the hotel site immediately east of the Highway 1 right-of-way. An existing receiving manhole in Seaside Court will be renovated to accept the flow from the force-main.

Project Need

This project is needed to serve the Marina Station development and existing Central Marina customers. The existing lift station facilities are too small to manage the increased sewage flow from the Marina Station development. The existing site is not properly located or sized. In addition, the Tate Park site is proposed because it is on the east side of Highway 1, improving resiliency against climate change.

Projected 5-Year CIP Budget

Total Projected Budget, \$k	FY24/25 \$k	FY25/26 \$k	FY26/27 \$k	FY27/28 \$k	FY28/29 \$k	Out Years \$k
2,847	2,847	0	0	0	0	0

Project Description

This project consists of rehabilitating an existing 30-inch sanitary sewer pipeline using cured-in place pipe (CIPP) trenchless technology and the installation of a new 30-inch sewer pipeline to replace two existing sewer pipelines that feed the existing 30-inch sewer. Project scope has decreased since the masterplan study due to changes in the development, with length reduced to 1,472 LF.

Project Need

This project is needed because the existing sewer facilities in the 1st Avenue alignment suffer from poor condition and have been in-service beyond their useful life. The northern end of the facilities (north of 8th Street) have already been rehabilitated using CIPP.

Projected 5-Year CIP Budget

Project Description

Plan, design, and construct an indirect potable reuse system. A feasibility study was completed in October 2022. The study evaluated an injection site at the Sand Tank site. The project includes 400 LF of pipeline to connect the site to the advanced treated recycled water transmission main, the injection well and appurtenances, and a backflow basin. Next the project will conduct a preliminary design effort to further refine design, permitting, finance, and agreement requirements. Once these are identified, the project will conduct detailed design then construction of the facilities.

Project Need

System will increase supply reliability and resilience over multiple hydrologic year types.

Project Description

This project is a part of the Monterey Subbasin GSP in the Monterey/Ord management area to address monitoring data gaps in the area.

Project Need

The project is needed to address GSP data gaps but to also analyze future feasibility of other projects that require further study of the aquifer system such as Indirect Potable Reuse (IPR) and/or Aquifer Storage and Recovery (ASR).

DEBT OBLIGATIONS

In accordance with the District's Debt Management Policy, the District issues debt for the purpose of financing the cost of design, acquisition, and/or construction of water, wastewater and recycled water system improvements in furtherance of the District's Capital Improvement Program (CIP). The District's debt obligations consist of the following debt instruments:

SANTA CRUZ BANK INSTALLMENT LOAN (HOLMAN CAPITAL)

On January 20, 2017, the District converted a construction loan that financed the construction of an office building at 940 2nd Avenue within Imjin Office Park in Marina, which is currently leased to the Bureau of Land Management, to a 20-year fixed rate loan. The installment loan in the amount of \$2,799,880 has a fixed all-in rate of 5.75%. Commercial loan rates were at 5.00% - 7.00% for loans above \$250,000 at time of offer. There is no prepayment penalty on the installment loan, so the District has the ability to refinance it. Debt service payments are as follows:

Santa Cruz Bank Installment Loan (Holman Capital)

Year	Principal (\$)	Interest (\$)	Total (\$)
2025	115,240	122,149	237,388
2026	121,961	115,427	237,388
2027	129,075	108,314	237,388
2028	136,603	100,785	237,388
2029	144,571	92,817	237,388
2030-2034	859,615	327,325	1,186,941
2035-2037	645,661	66,503	712,164

STATE REVOLVING FUND (SRF) LOAN AGREEMENT 1

On January 25, 2018, the District entered into a construction installment sale agreement and grant with the California State Water Resources Control Board for the construction of the Regional Urban Water Augmentation Project ("RUWAP") transmission pipeline with a maximum amount of \$10,513,217 at an interest rate of 1.8% per annum and a completion date of September 30, 2020. The State amended the contract completion date to coincide with the completion date of the distribution system of March 30, 2022. Per the Agreement, there is a maximum grant component of \$3,595,789. Debt service payments are as follows:

Clean Water SRF Loan (Agreement 1)

Year	Principal (\$)	Interest (\$)	Total (\$)
2025	105,619	68,433	174,053

2050-2052	151,188	5,475	156,664

STATE REVOLVING FUND (SRF) LOAN AGREEMENT 2

On June 27, 2018, the District entered into a second construction installment sale agreement and grant (“2nd Agreement”) with the California State Water Resources Control Board for the construction of the RUWAP distribution system with a maximum amount of \$11,439,582 at an interest rate of 1.8% annum and a completion date of March 30, 2020. Due to the project’s bid process issues and construction timing issues, the State amended the completion date of the 2nd Agreement to March 30, 2023. Per the Agreement, there is a maximum grant component of \$3,698,779. The first debt service payment will be due March 30, 2024. Estimated debt service payments are as follows:

SRF 120 Water Recycling (Agreement 2)

Year	Principal (\$)	Interest (\$)	Total (\$)
2025	25,069	16,987	42,056
2026	25,521	16,535	42,056

2015 ENTERPRISE REFUNDING REVENUE BONDS

On June 30, 2015, the District issued 2015 Senior Lien Enterprise Revenue Refunding Bonds, Tax-Exempt Series A in the amount of \$29,840,000 and Federally Taxable Series B in the amount of \$1,115,000 (the “Bonds”). The Bonds were issued to refinance the District’s outstanding 2006 Certificates of Participation (COPs) which were issued for the purpose of financing improvements to the District’s water and wastewater systems and to refinance prior obligations. The Bonds, which closed on July 15, 2015, were an advance refunding of the 2006 COPs as the COPs were not callable until June 1, 2016. An escrow account, funded with treasury securities, was set up and used to pay the 2006 COPs. A portion of the 2006 COPs were utilized to refinance prior obligations on an advance basis. As a result, the Taxable Series B were required to refund a portion of the 2006 COPs. The true interest cost, which includes all annualized costs, is 3.712% for the Series A Bonds and 1.544% for the Series B Bonds. Debt service payments are as follows:

2015 Enterprise Refunding Revenue Bonds

Year	Principal (\$)	Interest (\$)	Total (\$)
2025	1,235,000	1,014,900	2,249,900
2026	1,300,000	953,150	2,253,150
2027	1,365,000	888,150	2,253,150
2028	1,430,000	819,900	2,249,900
2029	1,500,000	748,400	2,248,400
2030-2034	8,645,000	2,605,563	11,250,563
2035-2037	6,130,000	623,000	6,753,000

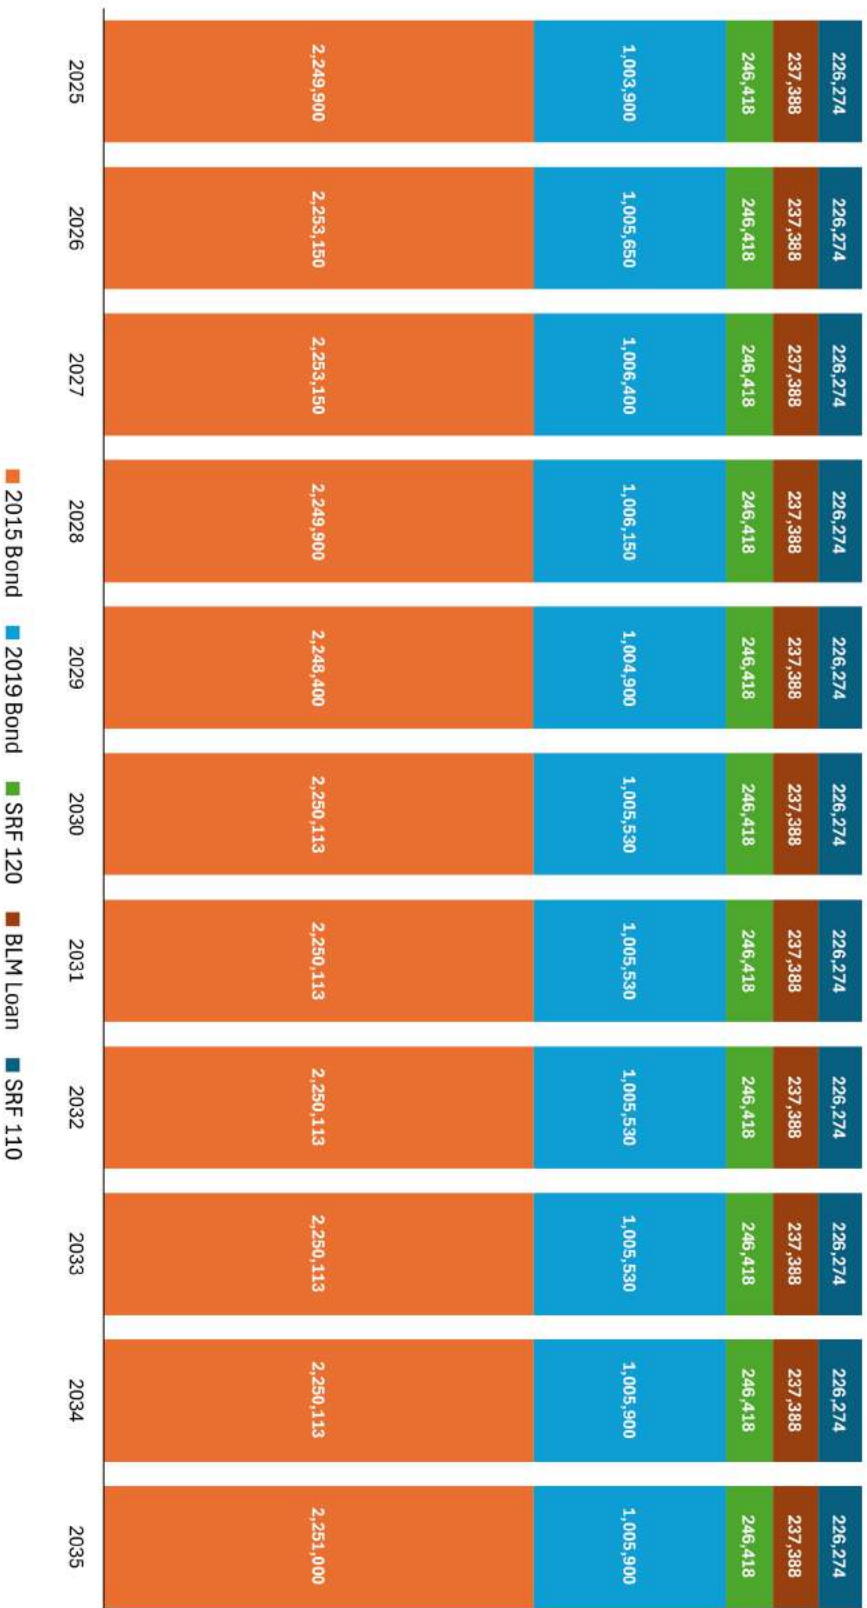

2019 ENTERPRISE REVENUE CERTIFICATES OF PARTICIPATION (COPS)

The District issued COPs worth \$17,725,000 on December 19, 2019, to fund necessary capital improvement projects such as pipeline improvements, booster pump replacements, and reservoir tank construction. Emergency generators were also acquired for key well sites, booster stations, and sewer pumping facilities to ensure they operate during power outages. The total cost, including all annualized expenses, amounts to 2.99% over thirty years. Below is the schedule of debt service payments:

2019 Enterprise Revenue Certificates of Participation (COPs)

Year	Principal (\$)	Interest (\$)	Total (\$)
2025	365,000	638,900	1,003,900

DISTRICT INVESTMENTS

The District has an Investment Policy that prioritizes safeguarding the invested principal and accrued interest while producing an acceptable rate of return. Safety and liquidity are the primary considerations before making investments.

As of June 30, 2024, the District's total estimated investments amount to \$42,289,848. The bulk of these investments, totaling \$29,511,553, is held with Mechanics Bank and includes a checking account, two money market accounts, and three certificates of deposits with a duration of 6 months.

Another integral component of our investment strategy is the Local Agency Investment Fund (LAIF), which is part of the State's Pooled Money Investment Account (PMIA) and is managed by the California State Treasurer's Office. LAIF is a popular investment option among California's local public agencies because of its convenience, low cost, and its emphasis on safety by investing in U.S. Treasury securities and liquidity primarily in short-term securities. The District's estimated balance in LAIF as of June 30, 2024, is \$7,144,845.

In response to evolving market conditions and opportunities, the district has expanded its investment by allocating funds to California CLASS, known for its competitive high-interest rates and emphasis on minimizing market risk through diversified investments. The projected balance in California CLASS as of June 30, 2024, stands at \$5,633,451.

FY 24/25 - District Investments	Balance as of 06/30/2023	Projected Balance as of 06/30/2024

The Vector truck is an important vehicle asset in maintaining the District's water, recycled water and sewer lines.

DISTRICT RESERVES

Adequate reserves ensure that the District will at all times have sufficient funding available to meet its operating, capital, and debt service cost obligations, together with the ability to fund future debt or capital obligations, as well as any unfunded mandates, including regulatory requirements.

MCWD maintains both restricted reserve funds and Board-designated reserve funds. Restricted reserve funds are comprised of proceeds from the sale of bonds, or any form of debt as governed by the corresponding financing documentation, and capacity charges. The District's restricted reserve funds include:

- a) RUWAP-110 Debt Reserve Fund
- b) RUWAP-120 Debt Reserve Fund
- c) Capacity Fee Reserve Fund
- d) Capital Replacement Reserve Fund
- e) Operating Reserve Fund

RUWAP-110 Debt Reserve Fund. This reserve fund was set up in March 2022 per the loan agreement with the State Revolving Fund which funded the construction of the recycled water transmission pipeline. The balance and earnings are to remain in the fund for the life of the loan and will be used to pay the final debt service payment of the loan in March 2052. The target level for this fund was predetermined by the loan agreement and is fully funded.

RUWAP-120 Debt Reserve Fund. This reserve fund was set up in March 2023 per the loan agreement with the State Revolving Fund which funded the construction of the recycled water distribution system. The balance and earnings are to remain in the fund for the life of the loan and will be used to pay the final debt service payment of the loan in March 2052. The target level for this fund was predetermined by the loan agreement and is fully funded.

Capacity Fee Reserve Fund. The monies in this fund are collected from developers and are restricted to pay for the new facilities necessary to deliver water and wastewater service to the newly developed property. The reserve fund is drawn upon as capital expenditures are made. The balance in this account fluctuates depending on the number and timing of development projects and therefore, no minimum or maximum target levels have been established.

Capital Replacement Reserve Fund. The Capital Replacement and Improvement Fund shall be used for the funding of the replacement of capital assets when they reach the end of their useful lives or improvements to any Component System. Each fiscal year, MCWD will strive to fund the Capital Replacement and Improvement Fund, based on the availability of funds. The target level shall be the most expensive asset to replace for each component system.

Operating Reserve Fund. The Operating Reserve Fund is used for unanticipated operating expenses and is designated to be utilized for current operations and to meet routine cash flow needs. This fund may be routinely utilized by staff to cover temporary cash flow deficiencies caused by (i) timing differences between revenue and expenses; (ii) unexpected decreases in revenues; or (iii) unexpected increases in expenses. The target levels for this Fund shall have a minimum balance equal to 150% of the District's currently budgeted total operating expenses excluding depreciation.
